Author Instructions

While submitting manuscripts, please carefully follow the instructions given below:-

- **Article Submission:** Our online editorial manager will be functional soon. For now, Submit the manuscript via google forms. Click here to make a submission or visit this link. [http://bit.ly/pj.smsubmit](http://bit.ly/pj.smsubmit)

- **Plagiarism:** Manuscripts are screened for plagiarism using Turnitin software and those found guilty or involved in publication misconduct are liable to be blacklisted.

- **Tables:** Do not submit tables as photographs. Give each column an abbreviated heading. Identify statistical measures such as standard deviation and standard error of the mean. Make sure that each figure and table are cited in the text.

- **Figures:** The figures should be sent in JPEG format with at least 300 dpi or resolution as a separate file. The desired position of any figure or table should be marked in the manuscript.

- **We only accept those manuscripts or data that have not been previously published or submitted elsewhere for publication. However, re-analysis of previously published data can be accepted.**

- **In case the manuscript was earlier submitted to some other Journal and was rejected, the authors must provide full information as to why it was rejected, for proper analysis.**

- **All manuscripts by multiple authors must be signed by all the authors and contain details of individual authors contribution. All authors must fulfill ICMJE criteria for authorship. In case of suspicion of gift authorship the journal may refuse further processing of the manuscript. Maximum of four authors are allowed in single center studies.**

- **Informed consent** of the patients participating in the study should be undertaken.

- **All studies must be approved by the relevant Ethics Committee/Institutional Review Boards of the respective institutions and approval letter should be submitted alongwith the manuscript.**

- **The authors as well as reviewers are expected to declare the conflict of interest if any.**

- **The source of funding for the study should be clearly mentioned. Authors involved in scientific misconduct may be blacklisted and barred from further submissions.**

- **Scope of Pak J Surg Med**
abstract reflects the content of the article accurately. Single-digit figures should be written in words i.e., 2 should be written as two.

**Key Words:** Below the abstract give few keywords not more than ten that will assist indexers in cross-indexing the article as they are published with abstract. Use terms from the Medical Subject Headings (MeSH) list of index medicus, if suitable MeSH terms are not yet available for recently introduced terms, new terms may be used.

**Case Report/Review Article:** All review articles and case reports should be preceded by a summary. Authors submitting the review manuscript should include a section describing the methods used for locating, selecting, extracting, Land synthesizing data, databases searched and the time period. These methods should also be summarized in the abstract.

**Introduction:** This should summarize the purpose and the rationale for the study. It should neither review the subject extensively nor it should have data or conclusions of the study.

**Methodology:** This should include the exact method or observation or experiment. If an apparatus is used, it's the manufacturer's name and address should be given in parenthesis. If the method is established, give reference but if the method is new, give enough information so that another author is able to perform it. If a drug is used, its generic name, dose, and route of administration must be given. For patients, age, sex with mean age ± standard deviation must be given. The statistical method must be mentioned and specify any general computer program used. The Info system used should be clearly mentioned.

**Results:** It must be presented in the form of text, tables, and illustrations. The contents of the tables should not be repeated in the text. Instead, a reference to the table number may be given. Long articles may need subheadings within some sections (especially the Results and Discussion parts) to clarify their contents. Extra or supplementary materials and technical detail can be placed in an appendix where it will be accessible. It may be omitted from the printed version but may be published in the electronic version of the journal.

**Discussion:** This should emphasize the present findings & its variations or similarities with other work done in the field by other workers. Detailed data should not be repeated in the discussion again. Emphasize the new and important aspects of the study and the conclusions that follow from them. It must be mentioned whether the hypothesis mentioned in the article is true, false or no conclusions can be derived.

**References:** These should be typed in superscript. Maximum References: Original Article 25, Case Report 10, Review 40. These references should also be marked in the text. The author should ensure reference to locally published studies by doing proper literature searches. It may not be possible for the editor and reviewers to check the accuracy of all reference citations. To minimize such errors author should verify references against the original documents. The References should be written in Vancouver style as per “Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly work in medical journals”. Updated Dec. 2015. List all authors when there are six or fewer. If there are more than six authors, list six authors and “et al” Reference should provide the following information: Author’s name with initials, full title of cited article, name of the journal in which the article appeared (in abbreviated form), Year of Publication, Journal’s Volume, Number and finally first & the last page numbers. Write Page No. like this 120-126. Add DOI number of those references where it is available.

**Reference from the books should have Authors name and initials, the full title of cited article, complete title of the book, Name of Editors, address (city) the publisher, first and last page numbers and finally the year of publication, such as:-Haroon TS. How to plan a scientific study, ‘Medical Writing’ (second edition), Jawaid SA, Jafary MH & Zuberi SJ (Eds), Pakistan Medical Journalists Association, Karachi, Pakistan. 1993;pp 1-13.

**In the case of a multi-center study or trial, the reference should be given as Name of the Group or of study, the exact title of the study, full results or partial results, Name of the Journal, Volume and Number, pages and the year. For example:-TIMI Study Group: Comparison of invasive and conservative strategies after treatment with intravenous tissue plasminogen activator in acute myocardial infarction. Results of the TIMI Phase-II trial. N Eng J Med. 1989;320:618-627.

**Citation of personal communications and unpublished observations should be strictly limited and given in brackets in the text. These should not appear in the list of references. A paper may not be cited as “Under Publication or in Press” unless it has been accepted for publication & the name of the Journal given.**

**Author Certification Proforma:** Manuscripts must be accompanied by a letter of undertaking signed by all the authors. A scanned copy of Letter of Undertaking should also be emailed accompanied by Author Certification proforma (download ACP of PJSM from this link http://bit.ly/2RGShsY.)

**Authorship:** Authorship credit should be based on: 1) substantial contributions to conception and design, or acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. 4) Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved. Authors should meet conditions 1, 2, 3 and 4. (For details of ICMJE Authorship Criteria see Letter of Undertaking).

Acquisition of funding, collection of data, or general supervision of the research group, alone does not justify authorship. All persons designated as authors
Author Instructions

should qualify for authorship & all those who qualify should be listed. A maximum number of four tables or illustrations are allowed. If their number is more, the manuscript may not be accepted for further processing.

- All persons designated as authors should qualify for authorship and all those who qualify should be listed.
- Each author should have participated sufficiently in the work to take public responsibility for appropriate portions of the content.
- In the case of more than one author in a manuscript, the contributions of each person listed as an author in the study should be mentioned.
- When a large, multi-center group has conducted the work, the group should identify the individuals who accept direct responsibility for the manuscript. These individuals should fully meet the criteria for authorship defined above and editors will ask these individuals to complete journal-specific author and conflict of interest disclosure forms. When submitting a group author manuscript, the corresponding author should clearly indicate the preferred citation and should clearly identify all individual authors as well as the group name. Other members of the group should be listed in the acknowledgments. The addition and deletion of authors may not be permitted after submission with LOU signed by authors.

- **Acknowledgment:** All contributors who do not meet the criteria for authorship should be covered in the acknowledgment section. It should include persons who provided technical help, writing assistance and departmental head who only provided general support. Financial and material support should also be acknowledged. Persons who have contributed materially but do not justify authorship can be listed as “clinical investigators” or “participating investigators” or “Scientific advisors” or “critically reviewed the study proposal or collected data.”

- **Length of the Text:** The maximum length of the original manuscript should not exceed 3000 words including title page, table, and references. In exceptional cases, up-to 3500 words may be accommodated. For Review article 4000 words. Any term which is mentioned in the text quite frequently must be abbreviated but only if this does not detract from readers’ comprehension. Such as Acute Myocardial Infarction (AMI). The maximum number of tables & illustrations should not exceed four. Case Report: Short report of cases, clinical experience, drug trials and adverse effects can be submitted. Maximum length should not exceed 1500 words, the maximum number of ten references, one table or two illustrations. It must contain genuinely new information. Its format should be Title, Abstract, Introduction, Case Report, Discussion and References. Do mention the contribution of each author as per the authorship criteria. Case reports should not include a review of the literature. Letters: Maximum words 350 with 2 to 3 references. Extra charges will be applicable for lengthy manuscripts. Never start a new sentence or paragraph with figures. For example, “9 patients were admitted” should be written as “9 patients were admitted”. Single-digit figures should be written in words i.e. 2 should be written as two. The manuscript should be accompanied by a cover letter signed by all authors stating that the manuscript has been read and approved by all the authors, the requirements as stated earlier have been met, each author believes that manuscript contains honest work. Mention the name, address, phone, cell phone, e-mail and Fax Number of the corresponding author who will be responsible for communicating and final approval of the proofs. Only the correspondence author should communicate with the editor.

- **Clinical Trials:** Clinical Trials submitted for publication must be registered in the public registry, provide registration proof & all RCTs must be based on CONSORT statement. Unregistered trials will not be published.

- **Procedure:** PAKISTAN JOURNAL OF SURGERY AND MEDICINE is a peer reviewed international medical journal. All articles on receipt for publication are immediately acknowledged but this does not mean that it has been accepted for publication. After initial screening, the manuscripts with major deficiencies, or of no interest to our readers will not be accepted for further processing and external peer-reviewed and the submitter will get an email within two weeks of submission. The manuscript is sent to two or more than two Reviewers. We practice open peer review system. The ultimate authority to accept or reject the manuscript rests with the Editor. Authors have the right to communicate to the editor if they do not wish their manuscript to be reviewed by a particular reviewer because of potential conflicts of interests usually professional, but they may be asked to explain or justify their concerns which is important for the editor in deciding whether to honor such request. The author can also suggest the name of two possible reviewers but it is up to the editor to accept it. Some manuscripts may be processed earlier at a fast pace keeping in view their importance. On receipt of the comments from reviewers, and if approved, letter of acceptance is issued to the corresponding author. Date of publication is confirmed after receipt of publication charges. If required, clarifications are sought from the authors. No article is rejected unless similar comments are received from at least two reviewers.

- **Proof Reading:** The final version of J is sent to the corresponding author for proofreading before publication to avoid any mistakes. Corrections should be conveyed clearly & Editor informed by e-mail.

- **Processing Charges:** No Article Processing Charges.

- **Publication charges:** Once the manuscript is accepted for publication, the authors are required to pay publication charges of Rs 5000/- (in case of overseas US$ 50/-) for articles, with an exception for those papers who have first 3 authors as PGRs. All Videos Under 5 minutes length will be published at the standard fee mentioned above.

- **Waiver request:** Those who cannot afford processing, publication charges can apply for waiver at the time of submission of paper (decision on case to case basis maximum discount available up to 50%).

- **Drug Trials:** Drug trials of preparations by pharmaceutical firms who are regular advertisers of Quarterly Pakistan Journal of Surgery & Medicine will be published without any additional charges after their...
Author Instructions

- **Ethics Committee Approval**: All manuscripts submitted to the Pakistan Journal of Surgery & Medicine involving human subjects must be accompanied with a certificate of Institutional Review Board / Ethics Committee Approval.

- **Ethical consent**: All manuscripts reporting the results of experimental investigations involving human subjects should include a statement confirming the informed consent was obtained from each subject or subject's guardian, after approval of the experimental protocol by a local human ethics committee.

- **Printed Copy**: This is Open access online journal and for print copies, please request at time of article submission.

- **Ombudsman**: In case of Disputes between Editor & author, please contact Prof. Dr Muhammad Iftikhar Hanif, Ombudsman Pakistan Journal of Surgery & Medicine.
